

# Wireless Modem Quick Start

## 1. Modem Setup

Insert the SIM Card into the Modem's SIM Card Slot  
Inset Modem into the Laptop or PC

## 2. Software Installation

After a few moments, the laptop or PC should automatically detect and install the Software.

(Notes: If the laptop or PC cannot auto-play, please double-click "My Computer", and then

double-click to install the software. Or right-click it to open it, then click "AutoInstall.exe" or "Install.exe" or "Setup.exe" to install the software.

Be patient when installing, selecting according to the indications. This process should take a few minutes.

A new icon will appear on the computer desktop.

## 3. Internet Connection

Double-click on the icon and then click "Internet Button"

Select “Connection name...”, if there is the option for your network.

If there is no option for your network, please add a new one and fill in the correct parameters and save it.

How to add new parameter option:

Click “New profile”, it will pop-up the following

The screenshot shows a 'New Connection' dialog box with the following fields and options:

- Connection Name: [ ] \*
- Phone Number: \*99# \*
- User name: [ ]
- Password: [ ]
- APN: [ ]
- Authentication:  CHAP  PAP  NONE
- Set Default (circled in red)
- Buttons: OK, Cancel

Please fill in the information parameter (This information parameter is from Network Provider), and click “OK” to save it. And you may select “Set Default” as your default connection parameters APN.

If select “Connection name...”, please select the existed APN setting.

The screenshot shows the 'Setup for surfing the internet' dialog box with the following fields and options:
