Professional Team

- **SW Team Chief:** 90 years experience, developed the first Smart phone in China
- **HW Team Chief:** 10 years experience, developed the first GSM from ADI chipset.
- **ID, MD Team Chief:** 9 years experience.
- **PM Team Chief:** 9 years experience, from Phillips.

Research & Development Department

E-Lins has been taking technology research and development as its developing foundation.

It is one of the few cellular products enterprises which insist on independent research and development.

We are not only own a R&D team with abundant experience and professional skills, but also actively introduce advanced equipment and technology, to provide hardware and software to the R&D and ensure the upgrade of R&D capacity.

E-Lins Technology Co.,Ltd

Project Department

We will make our great effort to meet the growing difference, individual communication demand of consumers.

We are dedicating to leading the world cellular technology, and 3G/4G technology in the mobile communication field.

E-Lins Technology Co.,Ltd

Advantages in the fierce competition

Advantage 1: We adopt the professional personnel with both professional skills and market knowledge to take the responsibility of R&D. They make the products developing plan, through understanding the technology developing trend, analyzing and evaluating the application of new technology. The products made in this way can be controlled easily and find its firm seat in the fierce market.

Advantage 2: Compared with our competing companies, our team is more effective. They can research and develop competitive products in shorter time, which bring low labor cost but high output.

Advantage 3: We have paid great attention to the product R&D. Through introducing senior engineers with advanced technological experience, we scientifically arrange senior engineers, designers and experimental testers to take charge of the special pre-research experiment, in order to guarantee that the products can remain their leading places in the Cellular market

Sales Networks

A fully covered sales network in China, by 63 distributors and 1200 retails shops.

Products are mainly exported to Spanish, Greece, Denmark, France, Germany, Netherlands, Romania, Brazil, Ukraine, Russia, Turkey, USA, Canada, Mexico, Brazil, Chile, Argentina, India, Thailand, Vietnam, Philippines, Pakistan, HK, Taiwan, etc.
