7. FAQ

7.1 No signal or No device.

Issue: Modem doesn't get signal or display "No device".

Solution: Check the USB modem is right insert into the PC. Check the sim card if it's working. You can put the sim card into other modem or device to confirm.

7.2 Dial up failed

Issue: Modem can get signal with the sim card. But always display “Dial up failed” when we try to connect.

Solution 1: confirm if sim card has enough balance.

Solution 2: confirm if the APN parameters are right set.
